The search system is working and can be used by all to find what they are looking for. It simple to use and very quick, it will search for a ID number, a persons name or the title and description for the word or words you enter. Just one warning it will search for the exact wording, IE. *Myford*

Lathe

will not match

Myford ML10 Lathe

but myford will return all matches. You can find it on the menu too your left.
